## **IBM NAAN MUDHALVAN**

# **Cloud Application Development- Group 1**

Project 1: Personal Blog on IBM Cloud
Static Web Apps

**Phase 3: Development Part** 

#### **Introduction:**

In this section, you will find a summary of the work completed during the third phase of the project, which involves the development of a static travel blog website. This phase includes the design and initial development of the website using HTML and CSS.

#### **Project Objectives:**

The primary objectives of this phase are as follows:

- 1. Design the layout of the travel blog website.
- 2. Develop the static web pages using HTML and CSS.
- 3. Create engaging and informative content with captivating photos and travel stories.

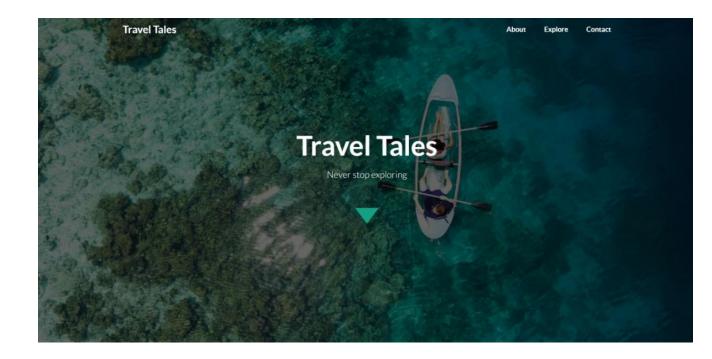

#### **Project Progress:**

#### **Website Layout Design:**

Designed the layout of the travel blog website, ensuring a userfriendly and visually appealing design.

### **HTML and CSS Development:**

- Created the home page of the website, providing the foundation for the project.
- Implemented navigation bar items with proper links to navigate to the respective pages.
- Incorporated an attractive image for the home page to enhance visual appeal.

#### **Challenges and Limitations:**

While progress has been made, there are a few challenges and limitations to consider:

- The website is currently static, and further development is needed to make it fully functional.
- Ongoing work is required to add more content, including travel stories and images.

### **Next Steps:**

The following steps will be taken in the next phase of the project:

- Continue building additional web pages for the website.
- Add engaging travel stories and high-quality images to enrich the content.
- Implement interactive features or functionality, if required.

## **Conclusion:**

The first part of the development phase has been successfully completed, with significant progress made in designing and creating the static travel blog website. The foundation has been laid for the upcoming development stages, which will further enhance the website's functionality and user experience.
